## FINANCIAL AND COMMERCIAL.

MONEY MARKET.

WEDNESDAY, Feb. 28-6 P. M. The stock market appears to be in a very unsettled, uncertain condition. Quotations fall off one day and recover the next. Yesterday, at the first beard, prices were lower than on the day previous. This morning an advance was realized throughout the list. These fluctuations are all among the brokers, and it matters little how violent they may be. Outsiders cannot be caught so easily. At the first board to-day Illinois Central Bonds advanced ; per cent; Canton Co., 2; Cumberland Co., ½; Eric Railroad, ½; Harlem, ½; Reading Railroad, 2; Chica go and Rock Island, 1. Illinois Central Bonds contione in active demand, and closed one half per cent better than the opening. Eric Bonds, 1875, remain about the some. Fancy stocks are merely floating at present prices from one broker's hands to au-other, and any advance which may be reported today may be lost to morrow. Holders are able to keep them up by the great abundance of money but this is by no means a profitable game to play for any length of time, and cannot continue unless new players enter the arena. Sellers are making interes all the time, and occasionally bag one or two pe sent on differences.

After the adjournment of the board the following sales of bonds and stocks were made at auction:— \$100,000 Penn. Coupon Fives, 1877, int. added. . 90a 90 %

The falling off in receiple from customs is com-

one million of dollars in the value of dutiable im

ports for the month. The fear expressed by some of

our cotemporaries relative to the reduction in re-

venue from the reduction in duties on imports is

without foundation, and would only have originated

in the minds of those who look at the tariff merely as a machine to be at all times used for some politi-

eal purpose. No apprehensions need be entertained

of any deficiency in the revenue. It would be much

better for the country at large if there was a small

sanual deficiency, for we then should not be draw-

ing from the channels of commerce the element that

preserves them healthy. It was never intended that the tariff should lock up between twenty and

thirty millions of specie, when it was so much

wanted as a basis for our currency. If a re-

dustion of twenty per cert in the tariff will not

distribute the surplus revenue, let us have

a further reduction, until the Tressury is emptied

of the millions which are now so greedily sought

after by all the speculating politicians of the day.

The arguments of these party organs in favor of in-

creasing duties on imports are really not worth re. plying to. If the Serate is true to the real interests

of the country, the House bill will be adepted at

The warrants entered at the Treasury Department

anthorizing the State to issue bonds to the amount

of \$170,000 in aid of the Delaware Railroad Compa-

my. The bonds are to have twenty-one years to run, and are to be secured by a second mortgage of the preperty of the company, and the lease of said

read to the Philadelphia, Wilmington and Baltimore

Railread Company, at an annual rental sufficient to pay the interest on said bonds, and also six percent

er avnum on all the stock subscribed for and neld by the State in the Delaware Railroad. The bonds

are not to be issued until the lease has been duly

executed, and a certified copy the cof furnished the

amounted to sixty-three per cent of the gross re-

ceip's. This is five and a half per cent greater

showing the net earnings of certain railroads on

cost, with the market value of the stock of each:-

According to this table the lowest in market

value is only the second on the list in productiveness. The Boston and Maine, with a net income on

cost of less than one-quarter per cent more than

the Reading, is selling at only two per cent dis-count, while the latter is selling at twenty-three

per cent discount. The Boston and Wor ester Bail-

road, with a net income of 7.38 per cent on cost, is selling within seven and a half per cent of par.

This great difference cannot exist long. The net

income of a railroad on cost is the only corr ct criterion of its actual value as an investment. In

our calculation for net in come on cost in the case of the Reading Railroad, we have put down the current operating expenditures at sixty per cent,

whereas it is without doubt the most cheaply operated road in the country, on account of its favor-

able grades and dumping facilities. It is only by

such comparisons that the real value of railroad

from the acts of Congress and from the company's charter, showing that its progress thus far has been strictly in a secrdance with the provisions of these acts. The future is open to one individual just as much as another, and the ultimate value of the company's property can be judged of by those in. enjoyed by each. There is one important feature in the finances of this company, which has been overlocked in the discussion and arguments relative to the value of the securities-and that is the margin left for calls upon the stock. This is a matter of so nuch magnitu'e that it is strange the company have not alluded to it more fully in their different reports. It increases very much the basis of the security upon which the bonds rest, and is sufficlent to make up any deficiency in any value placed upon the landed property of the company. The stock thus far has not been called in equally, and the margin left on some issues, which will be cover ed when necessary, is large enough to place the company in funds as they may be required, independent of its other resources. After reviewing the acts granting the lands, chartering the company, and regulating its bonded indebte dness, the Jour

In accordance with these provisions, the company, on the 19th March, 1851, organized, accepted the charter as above, and notified the Governor to that effect. The sum of \$200,000 in specie was deposited and duly acknowledged. On the 24th of that same month, a ceed of the lands, right of way, &c., was executed by the Governor to the company, and the same transferred by them to the trustees—namely. Morris Ketchum, John Morre, and samuel D Lockwood, granting the lot or ground in the City of Cairo as a deptt, the right of way, also the rail coad to be built, with the buildings thereon, to be held by them for the purprase named in the act.

The length of the road, as at present located, is 704 miles. The number of acres to which the company was entitled consequently amounted to 2,703,300, but owing to some misunderstanding with the Land Agent of the general government, the number actually received was 2,803/850. Of these, 250,000 were reserved for an interest furd, 2,000,000 were mortgaged for \$17,000,003, the sum estimated as sufficient to construct and equip the road. These last were classified as follows:

50,000 acres of the lowest agricultural value within 16 miles of the road worth, in 1875.

	within 15 miles of the road worth, in 1875,
\$1,500,000	1,300,000 of ordinary agricultural quality,
10,400,000	worth \$8
5,250,000	350,000 of superior agricultural quality, worth \$15.
A Production of	50,000 of first class lands, consisting of coal fields, quarries, minerals, town lots, &c.,
1,000,000	worth \$20

In accordance with the above acts of the United States In accordance with the above acts of the United States and of the State of Illinois, and of the organization of the company pursuant thereto, the main trank of the road catending from Cairo to the Illinois river, with the Galena branch, has been constructed. The Culcago branch has also been manife completed, and can be put in operation with a small additional outlay, and without much actes.

the state over heavy completee, and can be put in opera-tion with a small additional outlay, and without much delay.

The company have negotiated their \$17,000,000 loan as follows — \$4,000,000, bearing 7 per cont interest, in April, 1852; \$5,000,000 of 6 per cent, in London, in May, 1852. This loan carries a stock privilege equal to one-sinth of the whole stock (or 28,430 shares) of \$17,000,000.

A further issue of \$5,000,000 at 7 per cent, with the pri-vilege to each purchaser of \$1,000 in loads, of becoming a subscriber to three shares of the capital stock, was made in June, 1858; all of which bonds were taken at par. These, with the bonds to be taken as pay by con-inctors and other parties, make up the whole amount \$17,000,000 issued on the 2,000,000 acres of land and the reas.

The capital stock new consists of \$17,000,000 in shares of \$100 ccc. Or these, according to the last report

Boston & Maine. 8.93 96 a 95½

Old Colony. 4.64 76½ 77

New York Central. 6.25 94 a 94½

Philadelphia & Reading 8.75 76 a 76½

According to this table the lowest in market

oenstruction, eitner by sale of bonds, or stocks, or both, or by sale of lands pursuant to the provisions of the trust deed.

6/Subscribers to the stock, we consider, are liable to assessments to the par value of the same, to provide for any claims that may arise against the company. It was optional with the company to issue stock equal to the cost of the road, and the fact that a large issue has been made upon which assessments have been called in, is additional security to the bondholders.

Although the company cannot dispose of the 2,000,000 acres without receiving therefor the orices named in the schedules, they may make contracts for sale—the title to be passed only on payment.

Neither does there appear to be any doubt that all moneys received by the company have been properly applied to construction.

It will be seen that all the lands of the company, over and above 2,000,000 acres, may be disposed of at the pleasure of the company for the objects specified. The 2,000,000 acres, males they can be sold at the rate specified by the company, which must be so productive as to yield \$17,000,000, must be held by the company for a period of ten years, at which time they are directed by law to be offered annually at public sale.

It was not our object in the oatset, to discuss the probable success of the road. It has been constructed in an unparalled short period of time. Its carnings are so soon to become a matter of record that an opinion given at the present time would be almost superfluous. We would state, however, that considering the haste with which the road has been constructed, and its immense extent, and the sparseness of the pepulation upon a considerable portion of its line, the company and the public may probably be disappointed with the result of the first year's operation of the road, which neither upon this, nor upon any similar work, should be taken as any sufficient criterion of what its future earnings are to be.

The present coset of the road cannot be considered as extravagont. It has been c
